# (3) Revision of full-year consolidated performance forecast figures for the Year Ending February 2009 (March 1, 2008 – February 28, 2009)

(Unit: million yen)

|   | Sales   | Operating profit | Ordinary income | Net income |
|---|---------|------------------|-----------------|------------|
| Previous announced forecast (A)                         | 127,000 | 30,000           | 30,700          | 19,400     |
| Revised forecast (B)                                    | 127,000 | 30,000           | 31,000          | 19,500     |
| Amount of change (B-A)                                  | + 0     | + 0              | + 300           | + 100      |
| Rate of change (%)                                      | + 0.0%  | + 0.0%           | + 1.0%          | + 0.5%     |
| Results for previous period (Year ending February 2008) | 119,061 | 29,071           | 30,204          | 18,663     |

### (4) Revision of full-year individual performance forecast figures for the Year Ending February 2009 (March 1, 2008 – February 28, 2009)

(Unit: million ven)

|   | Sales   | Operating profit | Ordinary income | Net income |
|---|---------|------------------|-----------------|------------|
| Previous announced forecast (A)                         | 120,000 | 29,000           | 29,500          | 18,500     |
| Revised forecast (B)                                    | 120,000 | 29,000           | 30,100          | 19,000     |
| Amount of change (B-A)                                  | + 0     | + 0              | + 600           | + 500      |
| Rate of change (%)                                      | + 0.0%  | + 0.0%           | + 2.0%          | + 2.7%     |
| Results for previous period (Year ending February 2008) | 112,635 | 28,265           | 28,909          | 17,487     |

#### 2. Reason for revisions

### 1) Sales

While sales of the pharmaceuticals and related products segment dropped 3.9% as a result of a revision of the National Health Insurance prices, the segment grew steadily centering around Mohrus Tapes products, analgesic antiphlogistics. However, sales figures of Consumer Health Product division and International Business division are expected to fall below forecast figures due to intensified competitions in the market and lagged timing of the start of selling new products, respectively.

As a result, we expect sales for the first half year will be slightly lower than forecast figures but in the full year we expect to reach the original forecast figures as we plan to start marketing new products during the period.

#### 2) Revenue

With respect to expenses, there were lags arose in the timing of recording expenses.

With respect to non-operating income/loss, payment of dividends as a result of liquidation of a subsidiary company increased more than we predicted.

With respect to extraordinary income/loss, we recorded a one-time payment as a result of sales alliance for HFT-290 (a transdermal absorption-type continuous-action drug to treat cancer pain) and a milestone income.

As a result of the foregoing, revenues as well as operating profit, ordinary income, and net profit for the first half year are expected to significantly exceed forecast figures.

Because we plan to increase sales expenses, etc. in response to the lags arose in the timing of recording expenses and intensifying competitions in the market environment during the second half year, we expect in the full-year to meet the forecast figures as planned.
